THE ELECTION.

The vote cast in Adams county last Tuesday was an unusually small one. Of the 8400 electors of the county but 4931 appeared at the polls, showing 3500 absentees, the largest vote, 4931, being that for Prothonotary. This condition prevailed in Democratic as well as Republican districts and indicates the exist ence of indifference on the part of mem bers of both parties alike.

Democrat, having over Harris, Republi can, for State Treasurer 343 and Yerkes 102. William E. The results indicate, therefore, that Adam county remains Democratic under order dary conditions, Mr. Unger's defeat being due, not to his politics or his per sonality, but to a difference of opinion among the voters as to political management and the conduct of the Alm

CLOAKS AND SUITS.

The snappy weather of the last few weeks, and the certainty that has been forced into the minds of the people, that winter is on the way, has given our Ready-to Wear Department extraordinary business. The varied lines we carry, in full assortment of styles and sizes, allow few to go away disappointed who really desire to buy. Manufacturers have been unusually slow in filling re-orders and orders for special garments, owing to the fact of large business and slow deliveries of piece goods from the mills. We give an extract from a leading commercial paper showing

"So far as can be learned, the deliveries of pirce goods do not improve to an extent that is likely to relieve the situation within the near focure. Particularly is this true of goods mostly in demand, and generally is it true of nearly all fabrics that enter uto the composition of garments."

We therefore advise intending purchasers to attend to this want of a Wrap, Tailor-made Suit, Walking Skirt, Dress Skirt, Waist early to avoid disappointment as well as probably a saving on the purchase price. We will have no goods in stock but those rightly made, and no one can buy ready made goodduring a busy season, from first-class concerns, unless he has placed an initial order at the beginning, and we feet that unless you are satisfied with sweat shop garments the advice given above is much to your advantage. We, in part, saw the rush that would likely come in October and we are well prepared at present, but sizes and styles are thinning out rapidly now.

In the Report of the Pennsylvania State College, 1889 p 182 an account was given of the nature and distribution of this common and interesting insect It will be seen by reference to it that the brood of 188; will be due next year (1902) in the counties of Bedford Fulton Huntingdon M ffin Junata, Per Franklin, Cumberland Adams York, Daupten, Lebanon Lancaster B rks, Chester Delaware, Montgomery, Backs, Lehigh and Northampton

It is not meant that the Cicadas will appear over the woole of this large area but that they may be expected wherever voiable for their breeling and development Bush covered and woods pas ture lands are particularly good breed ng oluces 1...asmuch as seventeen years is liable to make a good deal of difference probable that in some places lands which seventeen years ago were aut in cultiva tion, and were good breeding grounds of them, and in their neighborhood the maects, true to their nature, may be obsly large numbers. In many places the older residents are able to locate these grounds - It, now, there should be young trust trees or shrups at hand they run great lisk of serious it jury and int telation by the egg laying process, since the nabit of the Cicada is to select small twigs into which it proceeds to cut in order to make a suitable place for its

Hence it would be wise for those if the counties named, who contemplate setting out trees this fall or next spring to had out whether they are on or nea 'locust ground'' of seventeen years ago and if they are, to defer planting a year or take this risk into consideration. If it seems best to take the risk

would be well not to name the trees closely on setting, but to postpone it until atter the egg laying of the Cicadas which takes place during June By July 1st at latest, probably two weeks earlier in the southern tier of equaties the egg-laying will have been completed and all its injury accomplished. The pruning may then be done and the cut off twigs burned, thus destroying the eggs of this meect, as well as giving the form and character desired in the young

Nine tenths of all the destruction caused by insects comes from not taking thee by the fore ock " People wait until a bonde of destructive insects suddenly appears, and then comes the pathetic inquity, ' What are they, and how can I destroy them or prevent their

W I Smith, of Hilles, N I, w' has been assisting J H Grove, of Fred eack, for the past two mouths in pur on using at ples in this section, gives so ta its showing that the growing of apples could be made one of the best paying in dustries engaged in by the farmers of Prederick county, estecially in the mountainous regions, where the frui grows the best and the land is the most mult to be worked for giam.

" We have purchased, picked and thopped for the Scaler Pruit and Cold Storage Co of Gaspors, N Y and J W Inorn Co of Philadelphia, says Mr. Smith, 'a total of 4 500 burels of apples loading _) cars and have left to the farmers of Frederick cours; \$12,000 his hills or the first so or cored I ie price paid for the fruit is more than t would bing on the market at the present time, out it has been bought on speculation, and is being held in cold storage for better prices this writer No doubt I'rederick people will be pay ing for the same fruit they sold for \$2 this fail, \$4 per barrel this winter. The cause of these high pieces is a most a total failure of the crop in the principal apple growing sections of the United

"No apple crchards to speak of have ever been set out in Frederick county for commercial surposes. Mr. M. which are made up of mostly York limperials. For the benefit of those who are cotemplating setting out an apple orthard, I would advise to set out nine tenths of the trees York Imperials You might add Smith Cider, Wine Sap and

Mr Smith states that Western New York, where he is engaged in fruit grow. ing, will in time be one of the greatest fruit growing sections of the Hoster States, and the growing of 60 cent wheat will be a thing of the past. Many apple orchards in Western New York are notting \$100 per acre annually. This is only produced by constant care, flist, in setting out the best varieties pruning, feeding, spraying and under constant cultivation during the season

Maryland has the advantage over New York State in that an orchard here becomes bearing to about half the time it takes in the latter State "The fruit grown in Maryland," says Mr Smith. "is just as attractive to the eye and will sell for as big price as New York State apples I see the price of York Imperiais and Wine Saps quoted today at \$1 ! and \$4.50 in New York city There is no reason why it would not pay the farmers of Frederick county to give more attention to the growing of apples and stop raising cheap wheat.".
